

IT Systems Administrator

At The Midfield Group we are committed to the growth and sustainability of our suppliers, our company, customers, and the communities in which we operate as to supply quality Australian products throughout the world.

The Midfield Group is privately owned and operates a true 'Paddock to Plate' experience as we own farms, factories, and distribution as to ensure we retain control of the key elements of the process of getting livestock from paddock to plate.

We are currently seeking an experienced **IT Systems Administrator** abased in Warrnambool Victoria.

About the role:

- Monitor IT applications, infrastructure, core server, network metrics and backup health
- Implement and maintain plans for IT redundancies, rollovers, and incident recovery through effective monitoring, alerting and cross-functional communication
- Maintain a high level of security across all Midfield Group IT Systems. Allocate user permissions, maintain system updates and patches, monitor and respond to security exceptions, manage SSO, 2FA and password policies
- Administer Azure & Microsoft 365 (OneDrive, SharePoint, Exchange, Endpoint Manager, and others) and organisation wide access to Microsoft shared resources
- Implement policies and procedures to maintain, improve and automate software installation and updates
- Manage project costs within approved budget, with a focus on the bottom line through revenue generation and cost reduction
- Contribute to overall IT Support across Midfield Group entities, including various production environments and remote sites (including farms)
- Maintain Active directory, Group policies, DNS, DHCP and other fundamental IT services for business functionality
- Develop accurate and thorough documentation of all work performed
- Flexible 40-hour work week with rotating 5am early shifts and on call
Typical work hours Monday-Friday 8am-5pm

About you:

- Effective and productive teamwork skills
- Strong organisational and effective time management skills
- Ability to manage and prioritise tasks
- Ability to work effectively under pressure
- Demonstrated skills in troubleshooting and problem solving
- Ability to communicate effectively
- Attention to detail
- Ability and willingness to mentor, upskill and share knowledge amongst peers
- Strong disciplines to develop accurate and thorough documentation of any work performed

Skills / Qualifications required for the role:

- 3-5 years experience in a similar role
- Diploma or bachelor's degree in computer science, Information Technology, System Administration desirable but not essential
- Experience with Windows Active Directory, Databases, Network Administration, or similar system administration experience
- System Administration and IT certifications in Linux, Microsoft, or other network related fields are a plus
- Working knowledge of Virtualization (e.g. VMWare, Proxmox or HyperV)
- Knowledge and experience with containerisation (Docker and/or Kubernetes) would be highly regarded
- Experience administering Azure and Microsoft365 tenancies
- Strong working knowledge of systems and networking software, hardware, and networking protocols
- Experience with scripting, automation tools and automation of software installation and updates
- SQL DB Administration Experience preferred

What We offer:

- Remuneration based upon experience
- Full time permanent position
- Opportunity for career progression within our global organization
- Employee Assistance Program
- Employee discounts, free parking and on-site canteen
- Relocation assistance

If you believe you are suitable for this position, please submit a current resume or directly contact us via email recruitment@midfield.com.au. Please note only shortlisted candidates will be contacted.

The Midfield Group are proud to be an Equal Opportunity Employer.
