

## **Microbiology Laboratory Manager**

The Midfield Group is seeking a Microbiology Laboratory Manager. A degree in Science (Microbiology related or similar) is desirable but not essential. All training will be provided. Recent graduates, previous experience in food, health, education industries or as a QA/QC Officer would be advantageous.

Flexible hours will be considered for the right applicant. Weekend work may be required on a rotating roster.

The following pre-requisites will see you working in a challenging and rewarding position within the Quality Assurance Team;

- High level of organisation and excellent communication skills
- A sound knowledge of the Microsoft Suite of packages including Excel
- Energetic in your approach to tasks, a committed and enthusiastic team player, passionate to pursue continuous learning and willing to undertake a wide range of tasks

### **Key Tasks and Responsibilities:**

- Ensure testing is performed in accordance with NATA, Department of Agriculture and Company approved procedures
- Meat and surface sample testing with reporting into LIMS software
- Lead a small team of 1 – 2 Lab Technicians/Assistants
- Perform hygiene and process control assessments of manufacturing processes

Remuneration and conditions will be discussed at time of interview.

Applications and resumes should be addressed to:
