

PREMIUM BEEF

Premium Beef

Protein Meal

PRODUCT DESCRIPTION:

Premium Beef Protein Meal manufactured from fresh, clean raw bovine tissue transferred internally from vertically integrated processing facility, ensuring that raw material undergoing further processing is no older than 7 hours to optimise product quality. Raw material then undergoes a refining stage where particle size is reduced. Raw material also passes through metal detection points prior to the preheating and drying phase of the manufacturing process. Precise temperature controls ensure our focus of maintaining highly digestible proteins can be achieved. Final product is then milled and sieved through a 2mm screen. Meal is then Stabilised with antioxidant prior to storage or final packaging.

COUNTRY OF ORIGIN:

Australia

PACKAGING:

Bulk Tote Bags or Bulk Container. Or other as advised by customer.

QUANTITATIVE AND QUALITATIVE REQUIREMENTS:

Chemical Analysis	Typical
Crude Protein	58%
Crude Fat	<15%
Moisture	<10%
Crude Ash	<23%
Fibre	<5%

ANTIOXIDANT:

A natural blended mix of tocopherols is added to the meal prior to storage for superior free radical absorption bringing stability and longer shelf life to the product.

STORAGE REQUIREMENTS:

This product should be stored at ambient temperature, under dry conditions.

SHELF LIFE:

Guaranteed 6 months minimum or greater by agreement with customer.

REGISTRATIONS:

Australian Renders Association – accreditation No 101
Export Approved- Est No 1753

EU Approved
HALAL ICCV certified

Head Office: Corner Scott Street & McMeekin Road, Warrnambool VIC, Australia, 3280.
