

PRIME LAMB

Prime Lamb

Protein Meal

PRODUCT DESCRIPTION:

Prime Lamb Protein Meal manufactured from fresh ovine material transferred internally from vertically integrated processing facility, ensuring that raw material undergoing further processing is no older than 7 hours to optimise product quality. Material undergoes a refining stage where particle size is reduced. Ovine Raw material is cooked in a set of batch cookers under automated high temperature and high-pressure controls. Meal is then stabilised with antioxidant prior to milling, sieving and final storage of the product.

COUNTRY OF ORIGIN:

Australia

PACKAGING:

Bulk truck or container. Other as advised by customer.

QUANTITATIVE AND QUALITATIVE REQUIREMENTS:

CHEMICAL ANALYSIS	TYPICAL
